

The National Assessment of Educational Progress (NAEP) assesses reading on a 0-500 point scale. In 2003, Atlanta City was one of nine urban districts that voluntarily participated in the NAEP reading assessment on a trial basis.

### Overall Reading Results for Atlanta

- In 2003, the average scale score for fourth-grade students in Atlanta was 197. This was not found to be significantly different<sup>1</sup> from the average score in 2002 (195).
- Atlanta's average score (197) in 2003 was lower than that of public schools in large central cities<sup>2</sup> (205), and lower than that of Georgia (214).
- The percentage of students in Atlanta who performed at or above the NAEP *Proficient* level was 14 percent in 2003. This percentage was not found to be significantly different from 2002 (12 percent).

### Student Percentage at NAEP Achievement Levels

NOTE: The NAEP reading scale ranges from 0 to 500, with the achievement levels corresponding to the following points: *Below Basic*, 207 or lower; *Basic*, 208-237; *Proficient*, 238-267; *Advanced*, 268 or above.

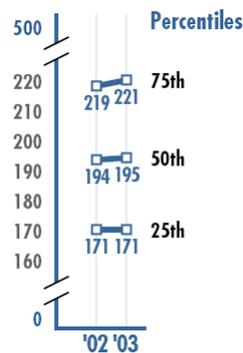

### Performance of NAEP Reporting Groups in Atlanta

Reporting groups	Percentage of students <sup>3</sup>	Average Score	Percentage of students at			
			Below <i>Basic</i>	<i>Basic</i>	<i>Proficient</i>	<i>Advanced</i>
Male	50	193	67	20	10	3
Female	50	200	59	26	11	4
White	10	250	9	23	40	28
Black	87	191	69	23	7	1
Hispanic	2	---	---	---	---	---
Asian/Pacific Islander	#	---	---	---	---	---
American Indian/Alaska Native	#	---	---	---	---	---
Free/reduced-price school lunch						
Eligible	81	189	71	22	6	1
Not eligible	19	230	29	26	29	17

### Average Score Gaps Between Selected Groups

- In 2003, male students in Atlanta had an average score that was not found to be significantly different from that of female students. In 2002, male students had an average score that was lower than that of female students.
- In 2003, White students had an average score that was higher than that of Black students (59 points). This performance gap was not significantly different from that of 2002 (58 points).
- The sample size was not sufficient to permit a reliable estimate for Hispanic students in Atlanta.
- In 2003, students who were not eligible for free/reduced-price school lunch had an average score that was higher than that of students who were eligible (41 points). This performance gap was not significantly different from that of 2002 (25 points).

### Reading Scale Scores at Selected Percentiles

An examination of scores at different percentiles on the 0-500 NAEP reading scale at each grade indicates how well students at lower, middle, and higher levels of the distribution performed.

# The estimate rounds to zero.

--- Reporting standards not met; sample size insufficient to permit a reliable estimate.

\* Significantly different from 2003.

↑ Significantly higher than, ↓ lower than 2002.

<sup>1</sup> Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates for students with disabilities and limited-English-proficient students in the NAEP samples and changes in sample sizes. NAEP sample sizes have increased since 2002 compared to previous years, resulting in smaller detectable differences than in previous assessments.

<sup>2</sup> "Large central city" includes nationally representative public schools located in large central cities within metropolitan statistical areas as defined by the federal Office of Management and Budget. It is not synonymous with "inner city."

<sup>3</sup> For comparison, minority students comprised 77 percent of students in large central city public schools and 41 percent in public schools nationally. Also, students eligible for free/reduced-price school lunch comprised 69 percent of students in large central city public schools and 44 percent in public schools nationally.

NOTE: Detail may not sum to totals because of rounding, and because the "Information not available" category for Free/reduced-price lunch is not displayed. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
