

The National Assessment of Educational Progress (NAEP) assesses reading in two contexts described in the NAEP framework: reading for literary experience and to gain information. The NAEP reading scale ranges from 0 to 500.

Overall Reading Results for Maryland

- In 2003, the average scale score for fourth-grade students in Maryland was 219. This was not found to be significantly different¹ from the average score in 2002 (217), and was higher than the average score in 1992 (211).
- Maryland's average score (219) in 2003 was not found to be significantly different from that of the nation's public schools (216).
- Of the 53 states and jurisdictions² that participated in the 2003 fourth-grade assessment, students' average scale scores in Maryland were higher than those in 15 jurisdictions, not significantly different from those in 23 jurisdictions, and lower than those in 14 jurisdictions.
- The percentage of students in Maryland who performed at or above the NAEP *Proficient* level was 32 percent in 2003. This percentage was not found to be significantly different from 2002 (30 percent), and was greater than that in 1992 (24 percent).

Student Percentage at NAEP Achievement Levels

[†] Accommodations were not permitted for this assessment.

NOTE: The NAEP reading scale ranges from 0 to 500, with the achievement levels corresponding to the following points: *Below Basic*, 207 or lower; *Basic*, 208-237; *Proficient*, 238-267; *Advanced*, 268 or above.

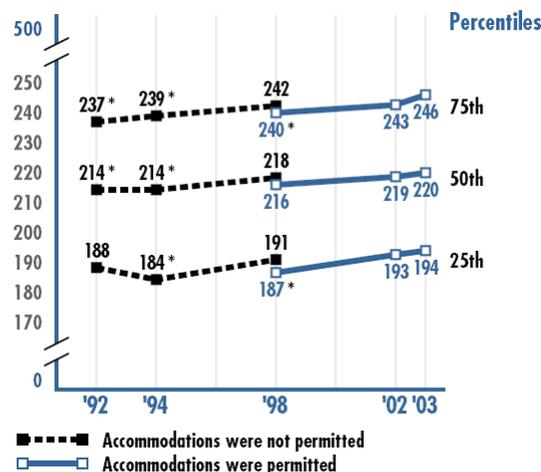

Performance of NAEP Reporting Groups in Maryland

Reporting groups	Percentage of students	Average Score	Percentage of students at			
			Below <i>Basic</i>	<i>Basic</i>	<i>Proficient</i>	<i>Advanced</i>
Male	50	215	42	29	21	8
Female	50	222	34	31	26	10
White	52	231	24	32	31	13
Black	37	200	59	28	12	2
Hispanic	5	209	48	28	20	3
Asian/Pacific Islander	5	237	20	28	33	18
American Indian/Alaska Native	#	---	---	---	---	---
Free/reduced-price school lunch						
Eligible	34	199	60	27	12	2
Not eligible	61	230	26	32	30	13

Average Score Gaps Between Selected Groups

- In 2003, male students in Maryland had an average score that was lower than that of female students (7 points). This performance gap was not significantly different from that of 1992 (9 points).
- In 2003, White students had an average score that was higher than that of Black students (31 points). This performance gap was not significantly different from that of 1992 (29 points).
- In 2003, White students had an average score that was higher than that of Hispanic students (22 points). This performance gap was not significantly different from that of 1992 (24 points).
- In 2003, students who were not eligible for free/reduced-price school lunch had an average score that was higher than that of students who were eligible (31 points). This performance gap was not significantly different from that of 1998 (30 points).

Reading Scale Scores at Selected Percentiles

An examination of scores at different percentiles on the 0–500 NAEP reading scale at each grade indicates how well students at lower, middle, and higher levels of the distribution performed.

The estimate rounds to zero.

--- Reporting standards not met; sample size insufficient to permit a reliable estimate.

* Significantly different from 2003.

↑ Significantly higher than, ↓ lower than 2002.

¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates for students with disabilities and limited-English-proficient students in the NAEP samples and changes in sample sizes. NAEP sample sizes have increased since 2002 compared to previous years, resulting in smaller detectable differences than in previous assessments.

² "Jurisdictions" includes participating states and other jurisdictions (such as the District of Columbia and the Department of Defense Dependents Schools).

NOTE: Detail may not sum to totals because of rounding, and because the "Information not available" category for Free/reduced-price lunch is not displayed.

Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
