The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

## I. Overview

The Private School Universe Survey (PSS) is conducted by the National Center for Education Statistics (NCES) on behalf of the U.S. Department of Education in order to collect basic information on American private elementary and secondary schools. PSS grew out of a proposal in 1988 to develop a private school data collection that would improve on the sporadic collection of private school data dating back to 1890 and improve on commercially available private school sampling frames. PSS was first collected in the 1989-90 school year, with data collections every 2 years since.

The target population for PSS is all schools in the United States that are not supported primarily by public funds, provide classroom instruction for one or more of grades kindergarten through 12 (or comparable ungraded levels), and have one or more teachers. Organizations or institutions that provide support for homeschooling but do not provide classroom instruction are not included.

## Purpose and Content of the Survey

PSS is currently designed to generate biennial data on the total number of private schools, teachers, and students, and to build a universe of private schools to serve as a sampling frame for NCES sample surveys.

The 2009-10 PSS consisted of a single school questionnaire designed to be filled out by school administrators. Data collected included enrollment by grade, enrollment by race/ethnicity and sex, number of high school graduates, number of teachers, program emphasis, existence and type of kindergarten program, school religious orientation or affiliation, association membership, number of days in the school year and length of the school day, and whether the school had a library media center. A copy of the 2009-10 PSS questionnaire is contained in appendix A.

## Content of the Manual

This Manual contains sections covering frame creation, data collection procedures and response rates, data preparation, guide to the public-use data file and codebook, and user notes and cautions.

Information in the chapters is supported by material in the appendices. Appendix A contains a copy of the 2009-10 PSS questionnaire, appendix B contains the list of variables and record layout of the public-use tab-delimited ASCII file, and appendix C contains the 2009-10 PSS public-use codebook.

## II. Frame Creation

Since PSS attempts to include every private school in the United States, a universe list of private schools meeting the PSS definition (i.e., not supported primarily by public funds, providing classroom instruction for one or more of grades kindergarten through 12-or comparable ungraded levels, and having one or more teachers) must be created. Since 1983, NCES has used a dual frame approach for building the private school universe (Beller 1984). The dual frame consists of a list frame and an area frame. The combination of the list frame schools and additional schools identified in the area search comprised the schools included in the 2009-10 PSS.

## List Frame

The list-building component was the primary means for improving coverage of private schools. The basis for the 2009-10 PSS list frame was the in-scope cases from the 2007-08 PSS list frame. Additionally, programs identified in the 2007-08 PSS as prekindergarten only or temporarily without students were also included. In order to provide coverage of private schools founded since 2007 and to improve coverage of private schools existing in 2007, membership lists from 29 private school associations and religious denominations were received and processed. The departments of education from 49 states and the District of Columbia provided lists of private schools (NCES did not receive a list from Wyoming). All 49 state lists and the list from the District of Columbia were processed. Additional private schools that submitted requests to NCES to be included in PSS were added to the list frame.

Beginning in 1995, the PSS private school definition was expanded to include schools for which kindergarten is the highest grade (kindergarten terminal or k-terminal schools). In 2009, a separate listbuilding operation (early childhood operation) was conducted to identify k-terminal schools. NCES received lists of programs that might include a kindergarten from sources other than state departments of education, including state departments of health or recreation, state child care licensing agencies, and child care referral agencies. In 2009, 24 lists were received and 19 lists were processed (5 lists were not processed because of resource constraints.)

Schools on private school association membership lists, the state lists, and the early childhood lists were compared to the base list, and any school that did not match a school on the base list was added to the private school universe list. The total number of private schools added by the 2009-10 list-building operation was 5,775 , resulting in a total list frame of 38,689 schools.

## Area Frame

To identify private schools that might have been overlooked in the list-building component, a group of geographic areas was selected to be searched for private schools. The United States is divided by the Census Bureau into 2,062 primary sampling units (PSUs), each PSU consisting of a single county, independent city, or group of contiguous counties. The area frame consists of a sample of these 2,062 PSUs.

A total of 124 distinct PSUs ( 159 counties) were in the 2009-10 PSS area frame sample. Within each of these PSUs, the Census Bureau attempted to find all eligible private schools. A block-by-block listing of all private schools in a sample of PSUs was not attempted. Rather, regional office field staff created the frame by using such sources as yellow pages, local Catholic dioceses, local education agencies, and local government offices. Once the area search lists were constructed, they were matched with the NCES private school universe list. Schools that did match the universe list were deleted from the area frame. A
total of 1,613 schools were added to the universe from the area frame resulting in a total frame of 40,302 schools.

## Weighting

The final weights are needed to have the estimates reflect the population of private schools when analyzing the data. The data from the area frame component were weighted to reflect the sampling rates (probability of selection) of the PSUs. Survey data from both the list and area frame components were adjusted for school nonresponse. The final weight for PSS data items is the product of the Base Weight and the Nonresponse Adjustment Factor, where:

Base Weight is the inverse of the probability of selection of the school. The base weight is equal to one for all list-frame schools. For area-frame schools, the base weight is equal to the inverse of the probability of selecting the PSU in which the school resides.

Nonresponse Adjustment Factor is an adjustment that accounts for school nonresponse. It is the weighted (base weight) ratio of the total eligible in-scope schools (interviewed schools plus noninterviewed schools) to the total responding in-scope schools (interviewed schools) within cells. Noninterviewed and out-of-scope cases are assigned a nonresponse adjustment factor of zero.

The cells used to compute the nonresponse adjustment were defined differently for list-frame and areaframe schools. For schools in the list frame, the cells were defined by affiliation ( 17 categories), locale type ( 4 categories), grade level ( 4 categories), Census region (4 categories), and enrollment ( 3 categories). The nonresponse adjustment cells for area-frame schools were defined by three-level typology ( 3 categories) and grade level (4 categories).

If the number of schools in a cell was fewer than 15 or the nonresponse adjustment factor was greater than 1.5 , then that cell was collapsed into a similar cell. The variables used to collapse the cells and the collapse order varied according to whether the school was from the list or area frame and whether a school was a traditional or k-terminal school. The cells for traditional schools from the list frame were collapsed within enrollment category, locale type, grade level, and Census region. Cells for k-terminal schools from the list frame were collapsed within enrollment category, locale type, Census region, and affiliation. Cells for traditional schools from the area frame were collapsed within grade level and then within three-level typology. Cells for k-terminal schools from the area frame were collapsed within threelevel typology.

## Variance Estimation

In surveys with complex sample designs, direct estimates of sampling errors that assume a simple random sample will typically underestimate the variability in the estimates. The PSS sample design and estimation included procedures that deviate from the assumption of simple random sampling, primarily resulting from the stratified cluster sampling occurring in the area frame.

## Producing Replicate Weights

The preferred method of calculating sampling errors to reflect these aspects of the complex sample design of PSS is using replication. Replication methods involve constructing a number of subsamples, or replicates, from the full sample and computing the statistic of interest for each replicate. The mean square
error of the replicate estimates around the full sample estimate provides an estimate of the variance of the statistic. The replicate weights are used to compute the variance of a statistic, $Y$, as given below:
$\operatorname{Variance}(Y)=\left(\frac{1}{n}\right) \sum_{r}\left(Y_{r}-Y\right)^{2}$
where: $Y_{r}=$ the estimate of $Y$ using the $r^{\text {th }}$ set of replicate weights
$n=$ the number of replicates
PSS uses a procedure known as balanced repeated replication (BRR) for the calculation of sampling variance. BRR assumes sampling is done with replacement, and hence, BRR does not reflect the increase in precision due to sampling a large proportion of a finite population.

To execute the BRR procedure, half-samples are defined by pairing sample PSUs within each sampling stratum, forming variance strata. The final product is 88 replicate weights. After the variance strata were assigned, an orthogonal matrix (matrix $H$ where: $H H^{T}=n I_{n}$ where $I_{n}$ is the identity matrix of order $n$ ) was used to form the 88 balanced half-sample replicates.

## Applying Replicate Weights

Each PSS data file includes a set of 88 replicate weights designed to produce variance estimates. Replicate weights were created for each of the 88 samples using the same estimation procedures used for the full sample and are included in the data file. The replicate weights for PSS are REPW1 to REPW88.

The computation of sampling errors using these replicate weights can be done easily using one of the following software: AM Statistical Software, SAS, STATA, SUDAAN, or WesVar Complex Sample Software.

AM. The user needs to set the replicate weights along with the replication method using the rightclick context menu in the variable list window. Once the "Set Replicate Weights" window is displayed, the replicate weights as identified above can be highlighted and dragged into the window. At the bottom of the window are four options for replication method; BRR should be selected. For more information, visit http://am.air.org.

SAS. Standard errors based on BRR can be generated in SAS version 9.2 using the survey procedures (SURVEYMEANS, SURVEYFREQ, SURVEYREG, and SURVEYLOGISTIC) available in the SAS/STAT module. (This module is an addition to the Base SAS software.) The BRR method is specified in the PROC statement using the VARMETHOD option parameter (VARMETHOD=BRR). The replicate weight variables are specified using the REPWEIGHT statement (REPWEIGHTS variables; ). For more information, see http://www.sas.com/news/newsletter/stats/2008 10_14.html.

STATA. Standard errors based on BRR can be generated in STATA using the 'svy' commands. The data must first be declared as complex survey data using the 'svyset' command. This command also designates variables that contain information about the survey design, and specifies the default method for variance estimation. The 'vce' option to this command should be set for "brr" ("vce(brr)") for balanced repeated replication; the weight variables are specified with the option "brrweight(varlist)". See the STATA website, http://www.stata.com/capabilities/svy.html, for more information.

# SUDAAN. The user needs to specify the sample design as a "Balanced Repeated Replication" design as well as specifying the replicate weight variables. Specifying the sample design $(\mathrm{DESIGN}=\mathrm{BRR})$ is done in the procedure call statement (i.e., PROC DESCRIPT DESIGN = BRR;). The specification of the replicate weights is done with the REPWGT statement (i.e., to produce the sampling errors for estimates use the statement: REPWGT REPW1-REPW88;). For more information, visit www.rti.org/sudaan/. <br> WesVar. The user needs to create a new WesVar data file by specifying the full sample weight variable and the replicate weight variables as defined above, and the replication method, BRR. The replicate weights and the full sample weight can be highlighted and dragged to their appropriate place on the "New WesVar Data File" window. For more information, visit http://www.westat.com/westat/statistical software/wesvar/index.cfm. 

## Approximate Sampling Errors

Although the preferred method of calculating sampling errors to reflect the aspects of the complex sample design of PSS is using BRR, it is also possible to obtain approximate standard errors by simpler methods. One such method uses design effects (DEFF) of some key estimates obtained from the survey. The design effect of a survey estimate is defined as the ratio of the variance of the estimate under the sampling design used for the survey to the variance of the estimate under simple random sampling.

In stratified sampling designs like the one used for the 2009-10 PSS, cases within a particular stratum tend to have responses that are more similar than if the cases were chosen completely at random from the population. The appropriate value of $D E F F$ depends on the particular domain being analyzed (e.g., the $D E F F$ for secondary schools is different than that for elementary schools). Since each estimate has a different design effect and these may be unstable, an average $D E F F$ was computed over different variables. Table 1 gives average values of $D E F F$ for selected subgroups.

A simple method of obtaining the approximate standard error of an estimate from the survey is to first compute the standard error of the estimate under simple random sampling and multiply the standard error by the square root of the design effect (DEFT). An example of how to approximate the standard error of a survey mean is as follows. First, the mean should be estimated using the full sample weight and any standard statistical package like SAS or SPSS. Next, the standard error of the estimate should be obtained under simple random sampling without using weights. This unweighted standard error should then be multiplied by the square root of the average design effect to get the approximate standard error of the mean under the design. For example, suppose that the estimated (weighted) mean number of students in elementary schools is 140.9 and the simple random sampling standard error (unweighted) is 1.6512 students. The approximate standard error for the estimate would then be 2.5999 (i.e., 1.6512 students times 1.5746, the DEFT for elementary schools).

Table 1. Average PSS design effects (DEFF) and square root of the average design effects (DEFT) by selected school characteristics: 2009-10

| Selected school characteristic | DEFF | DEFT |
| :--- | :---: | :---: |
| Total | 2.3586 |  |
|  |  | 1.5358 |
| Private school type |  |  |
| Catholic | 0.7088 | 0.8419 |
| Other religious | 2.4793 | 1.5746 |
| Nonsectarian | 1.3497 | 1.1618 |
|  |  |  |
| School level |  |  |
| Elementary | 2.4794 | 1.5746 |
| Secondary | 1.0568 | 1.0280 |
| Combined | 1.1699 | 1.0816 |
|  |  |  |
| Enrollment size |  |  |
| Less than 50 | 2.3399 | 1.5297 |
| $50-149$ | 1.3505 | 1.1621 |
| $150-299$ | 0.9805 | 0.9902 |
| $300-499$ | 0.9576 | 0.9786 |
| $500-749$ | 0.0000 |  |
| 750 or more | 0.6761 | 0.0000 |
|  |  | 0.8223 |
| Urbanicity type |  |  |
| City | 1.6524 |  |
| Suburban | 1.5720 | 1.2855 |
| Town | 1.3119 | 1.2538 |
| Rural | 2.6016 | 1.0636 |

${ }^{1}$ No schools with this enrollment were include in the area sample.

## III. Data Collection

The 2009-10 PSS data were collected during the 2009-10 school year. The 2009-10 PSS used a mailout/mailback and internet data collection methodology. Follow-up of nonresponding cases was conducted first by computer-assisted telephone interviewing (CATI) and then by Census Bureau field representatives. Table 2 shows the specific data collection activities and the time frame when each occurred.

Table 2. PSS data collection time schedule: 2009-10

| Activity | Date(s) |
| :--- | ---: |
| Initial mailing offering on-line option | September 30, 2009 |
| First mailing of PSS questionnaires | October 16, 2009 |
| First mailing of reminder postcards | October 23, 2009 |
| Second mailing of PSS questionnaires | December 1, 2009 |
| Second mailing of PSS reminder postcards | December 8, 2009 |
| Internet data collection | September 30, 2009-May 11, 2010 |
| Field follow-up for cases with no phone numbers | January 8 - February 22, 2010 |
| Telephone follow-up for PSS nonresponse cases | January 11-March 6, 2010 |
| Field follow-up for mail and telephone nonresponse cases | April 11-May 10, 2010 |
| Receipt of last questionnaire included | August 24, 2010 |

SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 2009-2010.

## Data Collection Procedures

## Initial Mailing

The 2009-10 Private School Universe Survey (PSS) data collection began on September 30, 2009 with the mailout of a letter to most private schools describing how to respond to the 2009-10 PSS online, and including a userid and password for the online option (Amish and Mennonite schools were excluded from this mailout). (table 2)

## Questionnaire Mailings and Reminder Postcards

The first mailout of the PSS hardcopy questionnaires (to all private schools) occurred on October 16, 2009 and a second mailout of questionnaires (to non-responding schools only) occurred on December 1, 2009. Each of these mailings also included the instructions, userid, and password for the online option. A reminder postcard was sent 1 week after each questionnaire mailout. (table 2)

## Nonresponse Follow-up

## Telephone Follow-up

Telephone interviewing for PSS schools that had not responded by mail or internet, but for which phone numbers were available, began on January 11, 2010. Schools from the area frame operation and new list
frame schools were added to the workload at this time ${ }^{1}$ Telephone interviewing took place at the Census Bureau's CATI facilities located in Tucson, Arizona and Jeffersonville, Indiana. CATI follow-up for PSS cases continued through March 6, 2010. (table 2)

## Field Follow-up

On January 8, 2010, the Census Bureau's 12 Regional Offices began field or in-person follow-up on the PSS cases that did not have a telephone number listed. Field follow-up of these schools continued through February 22, 2010. (table 2)

Following CATI closeout in early March, additional follow-up of mail, internet, and telephone nonresponse cases was conducted by Census Bureau field representatives. Field follow-up continued through May 10, 2010. (table 2)

## Interviewer Training

CATI interviewers and Census Bureau regional office representatives conducting the PSS field follow-up received training on the content and data collection procedures for the 2009-10 PSS. CATI operator training consisted of 1 hour of self study and 3 hours of classroom instruction conducted at the Census Bureau's CATI facilities in Tucson, Arizona and Jeffersonville, Indiana. The Tucson training had 51 staff attend and the Jeffersonville training had 28 attendees. Training for field representatives consisted of 2 hours of self study. One hundred and fifty field representatives completed training.

## Efforts to increase Response Rates

Several steps were taken to maximize response rates during data collection. A prepaid business reply envelope was included in the questionnaire mailings for respondents to use when returning the completed questionnaires. Both questionnaire mailings were followed one week later with reminder postcards. In addition, a toll-free number and an e-mail address were provided for respondents to contact with inquires regarding the survey. Multiple follow-up contacts were made to nonrespondents by telephone and in person.

## Response Rates

## Unit Response Rate

The 2009-10 PSS uses two measures to evaluate response, the unweighted unit response rate and the weighted unit response rate ${ }^{2}$. While unweighted unit response rates generally measure the proportion of cases that produce usable information for analysis, weighted unit response rates can be used to estimate the proportion of the population covered by the units that responded. For the 2009-10 PSS, the unweighted unit response rate was 93.8 percent, while the weighted response rate was 93.6 percent (table 3). Because the weighted unit response rate for schools was greater than 90 percent, no unit bias analyses were performed.

[^0]Table 3. Number of responding and nonresponding schools, out-of-scope cases, and base-weighted and unweighted response rates, by frame: 2009-10

| Response status | List frame | Area frame | Total frame |
| :--- | :---: | :---: | :---: |
| Total |  |  |  |
| Base-weighted | 38,689 | 8,571 | 47,260 |
| Unweighted | 38,689 | 1,613 | 40,302 |
| Response |  |  |  |
| Base-weighted | 27,784 | 3,437 | 31,221 |
| Unweighted | 27,784 | 433 | 28,217 |
| Nonresponse |  |  |  |
| Base-weighted | 1,778 | 370 | 2,148 |
| Unweighted | 1,778 | 78 | 1,856 |
| Out-of-scope |  |  |  |
| Base-weighted | 9,127 | 4,764 | 13,891 |
| Unweighted | 9,127 | 1,102 | 10,229 |
| Response rate | 94.0 |  |  |
| Base-weighted | 94.0 | 90.3 | 93.6 |
| Unweighted |  | 84.7 | 93.8 |

${ }^{1}$ Not eligible for the PSS.
NOTE: The base weight is equal to the inverse of the probability of selection of the school.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 2009-2010.

## Item Response Rate

Just as schools sometimes chose not to respond to the 2009-10 PSS survey request, those that did respond occasionally chose not to answer all of the survey questions. Unweighted item response rates are calculated by dividing the number of schools responding to an item by the number of schools asked to reply to an item. Weighted item-level response rates in the 2009-10 PSS were generally high, ranging from 95 to 100 percent (table 4). Because the weighted item response rates were all greater than 95 percent, no item-level bias analyses were performed.

Table 4. PSS unweighted and final-weighted item response rates for private schools: 2009-10

| Item <br> number | Unweighted response rate | Final weighted response rate | $\left\lvert\, \begin{aligned} & \text { Item } \\ & \text { number } \end{aligned}\right.$ | Unweighted response rate | Final weighted response rate |

NOTE: The final weight is equal to the product of the base weight and a nonresponse adjustment factor for the school. SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), "Documentation Data File," 2009-2010.

## IV. Data Preparation

## Questionnaire Check-in and Data Capture

Paper questionnaires returned by individual respondents and those completed by field representatives during field follow-up were sent to the Census Bureau's National Processing Center (NPC) in Jeffersonville, Indiana. Upon receipt, codes were assigned to each questionnaire to indicate its status (e.g., complete interview, refusal, school closed). Then the questionnaires were grouped into batches for data capture.

The 2009-10 PSS data were captured using a combination of manual data keying and imaging technology, using the Integrated Computer Assisted Data Entry (iCADE) system. The questionnaires were disassembled and each page was scanned. Clerical staff reviewed and resolved data issues due to system errors such as the inability to read a barcode, inability to recognize a page corner point, or checkbox ambiguities (e.g., marks outside checkbox, scratch outs, random marks on a page). Each imaged response was presented to a keying operator and all fields except the checkboxes were keyed from image (KFI). The checkboxes were captured using Optical Mark Recognition (OMR). All non-blank data fields were 100 percent KFI verified.

After the PSS questionnaire data were captured, the output files from the different sources (keyed, Internet, and CATI) were merged into one file. Corrections to the name, address, and telephone numbers supplied by the respondents were then applied to the PSS file. These corrections were keyed, either by NPC or during the CATI interviews. All addresses were then checked with National Change of Address (NCOA) software, a commercial software package that corrects and standardizes addresses.

## Computer Pre-Edit

After data capture the data were processed through a pre-edit designed to identify respondent errors in variables needed for determining interview status or imputation. This pre-edit program generated lists of cases where there were potential data problems. Census Bureau staff reviewed the computer record of cases that met each pre-edit rejection condition. Whenever possible, unacceptable entries were corrected by the analyst using information reported in other questionnaire items or information from other sources. Unacceptable entries that could not be corrected were blanked in the data record. These procedures are referred to as "pre-edits" because staff, rather than computer algorithms, handled computer-identified problems.

## Computer Edit

After pre-edit corrections were made, the file was submitted to a completely automated computer edit. This edit consisted of a consistency edit, a blanking edit, and a logic edit. The consistency edit identified inconsistent entries within each record. The fields compared could be within items (e.g., if the response in item 9 a , whether any students were enrolled in $12^{\text {th }}$ grade last year, was "No," but the second part of the question reported $12^{\text {th }}$ graders enrolled the previous year) or between items (e.g., if kindergarten was reported in item 5 c and the response to item 10a indicated that the school did not offer kindergarten). Entries were corrected for those inconsistencies that could be resolved; for those that could not be resolved, the entries were deleted. The blanking edit assigned the "not answered" code to items that should have been answered but were not and deleted entries to items that should not have been answered.

In the logic edit, data from the 2007-08 PSS were used to fill the items with missing values whenever possible. For example, if the type of school was not reported in item 12 a and it had been reported on the 2007-08 PSS, the 2007-08 response was copied to the 2009-10 record. In addition to filling items where values were missing, some inconsistencies between students by race and total enrollment items were corrected by ratio adjustment during the logic edit. For records where the number of students in item 7 (students by race) did not equal the enrollment in item 6 (total enrollment), excluding prekindergarten, the item 7 entries were adjusted to be consistent with item 6 ; that is, each entry in item 7 was multiplied by the ratio of the student count in item 7 to the enrollment in item 6 , excluding prekindergarten.

## Imputation

After the edit processing was complete, there were missing values within some records classified as interviews. These were cases where the respondent had not answered some applicable questionnaire items (and data for these items were not added in the pre-edit, consistency, or logic edit) or the response had been deleted during editing. Values were imputed to the missing data during imputation, which is described below.

## Donor Imputation

In donor imputation, values were created by extracting data from the record for a sample case (donor) with similar characteristics, using a procedure known as the "sequential nearest neighbor hot deck" (Kalton and Kasprzyk 1982, 1986; Kalton 1983; Little and Rubin 1987; Madow, Olkin, and Rubin 1983). In order to match incomplete records to those with complete data, "imputation" variables that identify certain characteristics of the school that were deemed to be important to the reporting of the data in each item (e.g., religious affiliation, enrollment, school level) were used. Items were grouped according to the perceived relevance of the imputation variables to the data collected by the item. For example, school level (LEVEL) was used for matching incomplete records and donors to fill item 16 (length of school year) but was not used for item 7 (students by race).

Items 13b (located in a private home that is used primarily as a family residence), 14a and 14c (religious orientation or purpose, and religious orientation or affiliation), and 15 (association membership) did not go through the donor imputation program. If, after the logic edit, item 13 b or 15 was still incomplete, the assumption was made for item 13 b that the school was not located in a private home and for item 15 that the school did not belong to any associations. If values were still missing for items 14 a and 14 c after the logic edit, the records were reviewed and imputed by an analyst.

## Analyst Imputation

After the donor imputation was completed, there were records that still had missing values for 64 items. These were cases where the imputation failed to create a value because there was no suitable record to use as a donor, or the value imputed was deleted because it was outside the acceptable range for the item or was inconsistent with other data on the same record, or the religious orientation or purpose, or the religious orientation or affiliation, was not reported (items 14 a and 14 c ) and no previous PSS information was available.

For these cases, values were imputed by analysts to the items with missing data. That is, staff reviewed the data record, sample file record, and the questionnaire and identified a value consistent with the information from these sources for imputation.

## Imputation Flags

The imputation Flags indicate the imputation method used, such as donor imputation or analyst imputation. The codes used for imputation flags are described in section V.

## V. Guide to the Public-Use Data File and Code Book

The 2009-10 PSS public-use data file contains data from all 28,217 completed interviews. The public-use data are available in SAS, SPSS, and in tab-delimited ASCII (text) format. The public-use materials include SAS and SPSS syntax files, and survey documentation for public-use data users in Adobe Portable Document Format (pdf), which includes the 2009-10 PSS questionnaire, an ASCII file layout, and a codebook with the public-use variables in appendices A, B, and C of this report, respectively.

## Categories of Variables

Variables on the public-use PSS data files fall into one of five categories: frame, survey, weighting, imputation flag, and composite variables. The purpose of these categories is to help the user better understand what types of variables are included on the files and what the sources were for the variables.

Variables were classified as frame variables if they were drawn from the 2007-08 PSS file or based on the 2009-10 PSS frame update. Examples of frame variables include the school's permanent identification number (PPIN) or the ZIP code of the school's mailing address (PZIP).

Survey variables are the actual variables drawn from the questionnaire responses. Each item on the questionnaire has a small number printed to the left. This number is the source code. A single letter "P" was added to the beginning of the source code to create the corresponding variable name. For example, item 6a has a source code of 305 . On the data file, the variable name for this item is P305.

There are two types of weighting variables on the file. The first is the final weight for the respondent, and the second includes the 88 replicate weights. The final weight adjusts for nonresponse and the sampling rates of the area-frame PSUs, and is used so that estimates represent the population of private schools. The replicate weights are used as a set to generate standard errors for estimates. On the file, the final weight is named PFNLWT, and the replicate weights are REPW1 to REPW88.

The imputation flags identify whether a survey item was imputed for missing data. All survey variables have a corresponding imputation flag that indicates whether a value was imputed and, if so, what method was used. All survey imputation flags begin with " $F_{-}$" and are followed by the name of the variable. For example, the imputation flag for P135 is F_P135. The flag values represent the type of imputation method used and are as follows:
$0=$ Value not imputed
$4=$ Imputed by using a donor value
$5=$ Data adjusted by analyst during review

Composite variables are based on survey variables, frame variables, or other created variables. These variables are frequently used in NCES publications and have been added to the files to facilitate data analysis. A list of the composite variables included in the file is presented in the next section with an explanation of how they were derived.

## Composite Variables

DIOCESE - Diocese of Catholic school:
Purpose: To provide the Diocese in which a Catholic school is located.
General explanation: Based on the Catholic school's physical location (PCNTY).
Values:
See codebook in appendix c.
HIGR2010 - highest grade level in school:
Purpose: To provide a measure of the highest grade level in the school.
General explanation: The highest reported grade level in the school based on the grades offered (P135, P145, P155, P165, P175, P185, P195, P205, P215, P225, P235, P245, P255, P265, P275, P285, and P295).
Values:
$1=$ All Ungraded (P135 = 1 and P145-P295 = 2)
$2=$ Highest grade in school is prekindergarten (P145=1 and P155-P295=2)
$3=$ Highest grade in school is kindergarten (P155 = 1 and P165-P295 = 2)
$4=$ Highest grade in school is transitional kindergarten (P165=1 and P175-P295=2)
$5=$ Highest grade in school is transitional 1st grade (P175=1 and P185-P295=2)
$6=$ Highest grade in school is 1 st grade $(\mathrm{P} 185=1$ and $\mathrm{P} 195-\mathrm{P} 295=2)$
$7=$ Highest grade in school is 2nd grade (P195=1 and P205-P295 = 2)
$8=$ Highest grade in school is 3rd grade (P205 = 1 and P215-P295 = 2)
$9=$ Highest grade in school is 4th grade (P215=1 and P225-P295=2)
$10=$ Highest grade in school is 5th grade $(\mathrm{P} 225=1$ and $\mathrm{P} 235-\mathrm{P} 295=2)$
$11=$ Highest grade in school is 6th grade ( $\mathrm{P} 235=1$ and $\mathrm{P} 245-\mathrm{P} 295=2$ )
$12=$ Highest grade in school is 7th grade ( $\mathrm{P} 245=1$ and $\mathrm{P} 255-\mathrm{P} 295=2$ )
$13=$ Highest grade in school is 8th grade ( $\mathrm{P} 255=1$ and $\mathrm{P} 265-\mathrm{P} 295=2$ )
$14=$ Highest grade in school is 9th grade ( $\mathrm{P} 265=1$ and $\mathrm{P} 275-\mathrm{P} 295=2$ )
$15=$ Highest grade in school is 10th grade ( $\mathrm{P} 275=1$ and $\mathrm{P} 285-\mathrm{P} 295=2$ )
$16=$ Highest grade in school is 11 th grade $(\mathrm{P} 285=1$ and $\mathrm{P} 295=2)$
$17=$ Highest grade in school is 12 th grade $(\mathrm{P} 295=1)$
LEVEL - grade level of school:
Purpose: To provide a summary measure of the grades provided by the school.
General explanation: Based on the grades offered (P135, P145, P155, P165, P175, P185, P195, P205, P215, P225, P235, P245, P255, P265, P275, P285, and P295).
Values:
$1=$ Elementary: A school is elementary if it has one or more of grades K-6 and does not have any grade higher than grade 8 .
$2=$ Secondary: A school is secondary if it has one or more of grades 7-12 and does not have any grade lower than grade 7 .
$3=$ Combined: A school is classified as combined if it has one or more of grades $\mathrm{K}-6$ and one or more of grades 9-12. Schools in which all students are ungraded (i.e., not classified by standard grade levels) are also classified as combined.

LATITUDE10 - latitude:
Purpose: To provide a measure of a school's location.
General explanation: Based on the school's physical location.
Values:
The 3 digits to the left of the decimal represent the number of degrees from the equator; the 6 digits to the right of the decimal represent the fraction of the next degree carried out to six decimal places.

LOGR2010 - lowest grade level in school:
Purpose: To provide a measure of the lowest grade level in the school.
General explanation: Based on the grades offered (P135, P145, P155, P165, P175, P185, P195, P205, P215, P225, P235, P245, P255, P265, P275, P285, and P295).
Values:
1 = All Ungraded (P135 =1)
$2=$ Lowest grade in school is prekindergarten (P145 = 1 and P135 = 2)
$3=$ Lowest grade in school is kindergarten (P155 = 1 and P135-P145 = 2)
$4=$ Lowest grade in school is transitional kindergarten (P165 = 1 and P135-P155 =2)
$5=$ Lowest grade in school is transitional 1st grade ( $\mathrm{P} 175=1$ and $\mathrm{P} 135-\mathrm{P} 165=2$ )
$6=$ Lowest grade in school is 1st grade ( $\mathrm{P} 185=1$ and $\mathrm{P} 135-\mathrm{P} 175=2$ )
$7=$ Lowest grade in school is 2nd grade ( $\mathrm{P} 195=1$ and $\mathrm{P} 135-\mathrm{P} 185=2$ )
$8=$ Lowest grade in school is 3rd grade ( $\mathrm{P} 205=1$ and $\mathrm{P} 135-\mathrm{P} 195=2$ )
$9=$ Lowest grade in school is 4th grade ( $\mathrm{P} 215=1$ and $\mathrm{P} 135-\mathrm{P} 205=2$ )
$10=$ Lowest grade in school is 5th grade ( $\mathrm{P} 225=1$ and $\mathrm{P} 135-\mathrm{P} 215=2$ )
$11=$ Lowest grade in school is 6th grade ( $\mathrm{P} 235=1$ and $\mathrm{P} 135-\mathrm{P} 225=2$ )
$12=$ Lowest grade in school is 7th grade ( $\mathrm{P} 245=1$ and $\mathrm{P} 135-\mathrm{P} 235=2$ )
$13=$ Lowest grade in school is 8 th grade ( $\mathrm{P} 255=1$ and $\mathrm{P} 135-\mathrm{P} 245=2$ )
$14=$ Lowest grade in school is 9th grade (P265 = 1 and P135-P255 = 2)
$15=$ Lowest grade in school is 10th grade ( $\mathrm{P} 275=1$ and $\mathrm{P} 135-\mathrm{P} 265=2$ )
$16=$ Lowest grade in school is 11th grade ( $\mathrm{P} 285=1$ and P135-P275 = 2)
$17=$ Lowest grade in school is 12th grade ( $\mathrm{P} 295=1$ and $\mathrm{P} 135-\mathrm{P} 285=2$ )

## LONGITUDE10 - longitude:

Purpose: To provide a measure of a school's location.
General explanation: Based on the school's physical location.
Values:
The 3 digits to the left of the decimal represent the number of degrees from the prime meridian; the 6 digits to the right of the decimal represent the fraction of the next degree carried out to six decimal places.

MALES - number of K-12, ungraded male students in the school:
Purpose: To provide a measure for the total number of male students in the school.
General explanation: Based on the coeducational status of the school (P335), the number of male students in coeducational schools (P340), and NUMSTUDS.
Values:

$$
\begin{aligned}
\text { MALES }= & \text { P340 (if P335 = 1), } \\
& 0(\text { if P335 = }) \text { or } \\
& \text { NUMSTUDS (if P335 = })
\end{aligned}
$$

NUMSTUDS - number of K-12 and ungraded students in the school:
Purpose: To provide a summary measure of the non-prekindergarten enrollment in the school.
General explanation: Based on the grades-by-grade enrollment (P140, P160, P170, P180, P190, P200, P210, P220, P230, P240, P250, P260, P270, P280, P290, and P300).
Values:
NUMSTUDS $=$ P140 + P160 + P170 + P180 + P190 + P200 + P210 + P220 + P230 + P240 + P250
$+\mathrm{P} 260+\mathrm{P} 270+\mathrm{P} 280+\mathrm{P} 290+\mathrm{P} 300$
NUMTEACH - number of Full-Time-Equilivant (FTE) teachers in the school:
Purpose: To provide a measure of the number of FTE teachers in the school.
General explanation: Based on the number of teachers in each full-time and part-time work status category (P385, P390, P395, P400, and P405)
Values:
NUMTEACH $=\mathrm{P} 385+(.875 \times \mathrm{P} 390)+(.625 \times \mathrm{P} 395)+(.375 \times \mathrm{P} 400)+(.125 \times \mathrm{P} 405)$
ORIENTATION - school's religious or nonsectarian orientation:
Purpose: To provide a detailed religious and nonsectarian classification of private schools. General explanation: Based on the school's religious orientation (P430) or affiliation (P440):
Values:
$1=$ Roman Catholic (P440 = 1)
$2=$ African Methodist Episcopal (P440 = 2)
$3=$ Amish $(\mathrm{P} 440=3)$
4 = Assembly of God (P440 = 4)
$5=$ Baptist $(\mathrm{P} 440=5)$
$6=$ Brethren (P440 =6)
$7=$ Calvinist ( $\mathrm{P} 440=7$ )
$8=$ Christian, no specific denomination $(\mathrm{P} 440=8)$
$9=$ Church of Christ $(\mathrm{P} 440=9)$
$10=$ Church of God (P440=10)
$11=$ Church of God in Christ $(\mathrm{P} 440=11)$
$12=$ Church of the Nazarene $(\mathrm{P} 440=12)$
$13=$ Disciples of Christ $($ P440 $=13)$
$14=$ Episcopal (P440 = 14)
$15=$ Friends (P440=15)
$16=$ Greek Orthodox $(\mathrm{P} 440=16)$
$17=$ Islamic $(\mathrm{P} 440=17)$
$18=$ Jewish $(\mathrm{P} 440=18)$
$19=$ Latter Day Saints $(\mathrm{P} 440=19)$
$20=$ Lutheran Church - Missouri Synod (P440 = 20)
$21=$ Evangelical Lutheran Church in America $(\mathrm{P} 44=21)$
$22=$ Wisconsin Evangelical Lutheran Synod $(\mathrm{P} 440=22)$
$23=$ Other Lutheran $(\mathrm{P} 440=23)$
$24=$ Mennonite $(\mathrm{P} 440=24)$
$25=$ Methodist $(\mathrm{P} 440=25)$
$26=$ Pentecostal $(\mathrm{P} 440=26)$
$27=$ Presbyterian $(\mathrm{P} 440=27)$
$28=$ Seventh-day Adventist $(\mathrm{P} 440=28)$
$29=$ Other $(\mathrm{P} 440=29)$
$30=$ Nonsectarian $(\mathrm{P} 430=2)$

P_ASIAN - percentage of K-12 and ungraded students who are Asian, not of Hispanic or Latino origin:
Purpose: To provide a measure of the percentage of the school's students who are Asian.
General explanation: Based the number of Asian students (P316) and total K-12 and ungraded enrollment (NUMSTUDS).

## Values:

P_ASIAN = P316 / NUMSTUDS
P_BLACK - Percentage of K-12 and ungraded students who are Black or African American, not of Hispanic or Latino origin:
Purpose: To provide a measure of the percentage of the school's students who are Black or African American.
General explanation: Based the number of Black or African American students (P325) and total K-12 and ungraded enrollment (NUMSTUDS).
Values:

> P_BLACK = P325 / NUMSTUDS

P_HISPANIC - percentage of K-12 and ungraded students who are Hispanic or Latino, regardless of race:
Purpose: To provide a measure of the percentage of the school's students who are Hispanic or Latino.
General explanation: Based the number of Hispanic or Latino students (P320) and total K-12 and ungraded enrollment (NUMSTUDS).

## Values:

P_HISP = P320 / NUMSTUDS

P_INDIAN - percentage of K-12 and ungraded students who are American Indian or Alaska Native, not of Hispanic or Latino origin:
Purpose: To provide a measure of the percentage of the school's students who are American Indian or Alaska Native.
General explanation: Based the number of American Indian or Alaska Native students (P310) and total K-12 and ungraded enrollment (NUMSTUDS).
Values:
P_INDIAN $=$ P310 $/$ NUMSTUDS
P_PACIFIC - percentage of K-12 and ungraded students who are Native Hawaiian or other Pacific Islander, not of Hispanic or Latino origin:
Purpose: To provide a measure of the percentage of the school's students who are Native Hawaiian or Pacific Islander.
General explanation: Based the number of Native Hawaiian or Pacific Islander students (P318) and total K-12 and ungraded enrollment (NUMSTUDS).
Values:
P_PACIFIC = P318 / NUMSTUDS
P_TWO - percentage of K-12 and ungraded students who are two or more races, not of Hispanic or Latino origin:
Purpose: To provide a measure of the percentage of the school's students who are two or more races. General explanation: Based the number of students who are two or more races (P332) and total K-12 and ungraded enrollment (NUMSTUDS).
Values:
P_TWO = P332 / NUMSTUDS

P_WHITE - percentage of K-12 and ungraded students who are White, not of Hispanic or Latino origin: Purpose: To provide a measure of the percentage of the school's students who are White.
General explanation: Based the number of White students (P330) and total K-12 and ungraded enrollment (NUMSTUDS).
Values:
P_WHITE = P330 / NUMSTUDS
REGION - geographic region of school:
Purpose: To provide a summary measure of the school's physical location.
General explanation: Based on the state of the school's physical location (PSTFIP).
Values:
1 = Northeast: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New
York, New Jersey, and Pennsylvania;
2 = Midwest: Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North
Dakota, South Dakota, Nebraska, and Kansas;
3 = South: Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina,
South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas; and
4 = West: Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, and Hawaii.

RELIG - school's religious affiliation:
Purpose: To provide an summary classification for private schools.
General explanation: Based on the school's religious orientation and affiliation (P430 and P440)
Values:
$1=$ Catholic $(\mathrm{P} 430=1$ and P440 =1)
$2=$ Other religious ( $\mathrm{P} 430=1$ and P440 ne 1)
$3=$ Nonsectarian $(\mathrm{P} 430=2)$
SIZE - categorized number of K-12 and ungraded students in the school:
Purpose: To provide an summarye classification for private school enrollment.
General explanation: Based on the school's K-12 and ungraded enrollment (NUMSTUDS)
Values:
$1=$ Less than 50 students (NUMSTUDS $=1-49$ )
$2=50-149$ students (NUMSTUDS $=50-149$ )
$3=150-299$ students (NUMSTUDS $=150-299)$
$4=300-499$ students (NUMSTUDS $=300-499$ )
$5=500-749$ students (NUMSTUDS $=500-749)$
$6=750$ students or more (NUMSTUDS greater than 749)
S_KG - total number of kindergarten students in the school:
Purpose: To provide a total count of number of kindergarten students in the school.
General explanation: Based on the school's kindergarten (P160), transitional kindergarten (P170) and transitional first grade enrollment (P180).
Values:

$$
\text { S_KG }=\mathrm{P} 160+\mathrm{P} 170+\mathrm{P} 180
$$

STTCH_RT - student/teacher ratio:
Purpose: To provide a measure of the student/teacher ratio for K-12 and ungraded levels.
General explanation: Based on the school's FTE teachers (NUMTEACH) and total K-12 and ungraded enrollment (NUMSTUDS).
Values:

## STTCH_RT = NUMSTUDS / NUMTEACH

TABFLAG - tabulation flag:
Purpose: To allow selection of schools meeting the pre-1995 PSS definition of a private school.
General explanation: Based on the highest reported grade level reported in the school (HIGR2010) Values:
$1=$ Schools offering ungraded or grade 1 or above (HIGHR2010 ne 3, 4 or 5)
$2=$ Schools offering no grade higher than kindergarten (HIGHR2010 $=3,4$ or 5)
TOTHRS - length of school day in hours:
Purpose: To provide a measure for the total length of the school day.
General explanation: Based on the length of the school day in hours (P650) and minutes (P655)
Values:
TOTHRS $=$ P650 + P655/60
TYPOLOGY - NCES 9-category typology:
Purpose: To provide an summary classification for private schools.
General explanation: Based on the school's religious affiliation (RELIG and P445), association membership (P450-P640), and program emphasis (P415)
Values:
1 = Catholic, parochial - Catholic schools with a parochial or inter-parochial governance structure
(RELIG $=1$ and P445=1)
$2=$ Catholic, diocesan - Catholic schools with a Diocesan governance structure (RELIG $=1$ and P445=2)
3 = Catholic, private - Catholic schools with a private governance structure $($ RELIG $=1$ and P445 $=$ 3)

4 = Other Religious, Conservative Christian - Other religious schools with membership in at least one of four associations: Accelerated Christian Education, American Association of Christian Schools, Association of Christian Schools International, or Oral Roberts University Education Fellowship (RELIG $=2$ and P455, P460, P465, or P520 = 1)
$5=$ Other Religious, affiliated - Other religious schools not classified as Conservative Christian with membership in at least one of eleven associations-Association of Christian Teachers and Schools, Christian Schools International, Evangelical Lutheran Education Association, Friends Council on Education, General Conference of the Seventh-Day Adventist Church, Islamic School League of America, National Association of Episcopal Schools, National Christian School Association, National Society for Hebrew Day Schools, Solomon Schechter Day Schools, Southern Baptist Association of Christian Schools-or indicating membership in "other religious school associations." (RELIG $=2$, TYPOLOGY ne 4, and P467, P470, P480, P485, P490, P492, P500, P510, P515, P525, P530, or P535 = 1)
6= Other Religious, unaffiliated - Other religious schools not classified as Conservative Christian or affiliated (RELIG $=2$ and TYPOLOGY ne 4 or 5)
7 = Nonsectarian, Regular - Nonsectarian schools with a regular or early childhood program emphasis (RELIG $=3$ and P415 = 1 or 7 )
$8=$ Nonsectarian, special emphasis - Nonsectarian schools with a Montessori, career/technical/vocational, alternative, or special program emphasis (RELIG $=3$ and $\mathrm{P} 415=2,3,5$,
or 6)
$9=$ Nonsectarian, special education - Nonsectarian schools with a special education program emphasis $($ RELIG $=3$ and P415 $=45$ )

UCOMMTYP - urban-centric community type:
Purpose: To provide a measure of a school's community type relative to populous areas :
General explanation: Based on the urban-centric local code (ULOCALE).
Values:
1 = City (ULOCALE = 11, 12, or 13)
$2=$ Suburb (ULOCALE $=21,22$, or 23)
$3=$ Town (ULOCALE $=31,32$, or 33)
$4=$ Rural (ULOCALE $=41,42$, or 43)
ULOCALE - urban-centric locale code:
Purpose: To provide a measure of a school's location relative to populous areas.
General explanation: Based on the school's physical address or the mailing address, if the physical address is not reported
Values:
11 = City, Large: Territory inside an urbanized area and inside a principal city with population of 250,000 or more.
$12=$ City, Midsize: Territory inside an urbanized area and inside a principal city with population less than 250,000 and greater than or equal to 100,000 .
13 = City, Small: Territory inside an urbanized area and inside a principal city with population less than 100,000.
21 = Suburb, Large: Territory outside a principal city and inside an urbanized area with population of 250,000 or more.
$22=$ Suburb, Midsize: Territory outside a principal city and inside an urbanized area with population less than 250,000 and greater than or equal to 100,000 .
23 = Suburb, Small: Territory outside a principal city and inside an urbanized area with population less than 100,000 .
$31=$ Town, Fringe: Territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area.
$32=$ Town, Distant: Territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area.
$33=$ Town, Remote: Territory inside an urban cluster that is more than 35 miles of an urbanized area.
$41=$ Rural, Fringe: Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster. $42=$ Rural, Distant: Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural territory that is more than 2.5 miles but less than or equal to 10 miles from an urban cluster.
43 = Rural, Remote: Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster.

The variable names, descriptions, and descriptive statistics for all variables on the public-use file are contained in appendix C.

## Unique School Identifier

Each school record on the 2009-10 PSS file contains a unique school identifier, the permanent identification number (PPIN). PPIN is a unique 8 -character code assigned when a private school is first included in PSS. PPIN can be used to match a school's 2009-10 PSS record to those of other years.

## VI. User Notes and Cautions

This section provides some caveats and considerations that analysts should take into account when using the 2009-10 PSS data.

## Locale Code (Urbanicity)

The 2009-10 PSS public-use data file does not contain the 8-category locale code (LOCALE) that was included on the 2005-06 and earlier PSS files. The 2009-10 file does contain the new (2003) 12-category locale code (ULOCALE), which is also included on the 2003-04, 2005-06, and 2007-08 PSS data files.

## Race/Ethnicity

Beginning with the 2009-10 PSS, race/ethnicity data (Item 7) were collected following the Department of Education's October 2007 guidance on collecting and reporting race and ethnicity data. The seven race/ethnicity categories used in 2009-10 were Hispanic or Latino, regardless of race (P320); and for those not of Hispanic or Latino origin, American Indian or Alaska Native (P310), Asian (P316), Black or African American (P325), Native Hawaiian or other Pacific Islander (P318), White (P330), and Two or more races (P332). In earlier PSS collections, race/ethnicity data were collected using 5 categories; Asians and Pacific Islanders were combined in one category - Asian or Pacific Islander, and there was no category for those of two or more races.

## Appendix A. 2009-10 Private School Universe Survey Questionnaire

## PRIVATE SCHOOL SURVEY 2009-10 SCHOOL YEAR

## PLEASE NOTE:

The 2009-10 Private School Survey is intended to include all private -

## SCHOOLS that teach ANY of the following -

- At least one of grades 1-12
- Ungraded students between 5 and 18 years old
- Kindergarten - traditional year of school primarily for 5 -year-olds prior to first grade
- Transitional (or readiness) kindergarten - extra year of school for kindergarten-age children who are judged not ready for kindergarten
- Transitional first (or prefirst) grade - extra year of school for children who have attended kindergarten but have been judged not ready for first grade

## EARLY CHILDHOOD PROGRAMS AND DAY CARE CENTERS that have ANY of the following -

- Kindergarten
- Transitional (or readiness) kindergarten
- Transitional first (or prefirst) grade

For example:
An early childhood center that has a nursery school, a prekindergarten program, and a kindergarten would be eligible for this survey, since it includes a kindergarten.
But an early childhood center that has a nursery school and a prekindergarten program ONLY would NOT be eligible for this survey, since it does not include a kindergarten. You would mark box 2 in item $2 d$.

## DEAR ADMINISTRATOR:

The National Center for Education Statistics (NCES) of the U.S. Department of Education requests your participation in the 2009-10 Private School Survey, a national data collection that is very valuable to private schools across the country. The U.S. Census Bureau is conducting the survey for NCES; the survey is authorized by Title I, Part E, Sections 151(b) and 153(a) of Public Law 107-279, the Education Sciences Reform Act of 2002.

## WHY IS NCES SPONSORING THIS SURVEY?

The purpose of this data collection effort is to obtain current information about private schools, such as type of school, length of school year, number of students and teachers, and number of high school graduates, if any. We will use the data to produce a web-based private school search tool and statistical summaries about the providers of private education in the United States.

## WHO SHOULD PARTICIPATE IN THIS SURVEY?

The 2009-10 Private School Survey includes all private schools and early childhood programs that provide educational instruction to students in kindergarten or at least one of grades 1-12.

## WHY SHOULD YOUR SCHOOL PARTICIPATE IN THIS SURVEY?

Private schools are a significant segment of the nation's educational system. Results from previous surveys show that approximately 25 percent of all elementary and secondary schools in the United States are private; these schools enroll approximately 10 percent of the nation's children and employ 13 percent of the nation's teachers. NCES has instituted this survey in recognition of the importance of private education in the United States. While there is no penalty for not responding, a high response rate is very important to the success of the survey. We encourage you to participate in this voluntary survey.

## WHERE SHOULD YOU MAIL YOUR COMPLETED QUESTIONNAIRE?

Please return your completed questionnaire using the enclosed envelope. If you do not have the return envelope, mail your questionnaire to:

U.S. CENSUS BUREAU<br>ATTN: DCB 61G<br>1201 E. 10TH STREET<br>JEFFERSONVILLE, IN 47132-0001

THANK YOU FOR YOUR COOPERATION IN THIS VERY IMPORTANT EFFORT.
SINCERELY,

> ACTING COMMISSIONER FOR EDUCATION STATISTICS NATIONAL CENTER FOR EDUCATION STATISTICS

## Paperwork Burden Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is $1850-0641$. The time required to complete this information collection is estimated to average 20 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Education, Washington, DC 20202-4651. If you have comments or concerns about the contents of this questionnaire, write directly to: Private School Survey, National Center for Education Statistics, 1990 K Street, N.W., \#9012, Washington, DC 20006-5651.

1. Please print your name, title, and school telephone number in case we have questions about any of your responses.

YOUR NAME

TITLE
051 $\square$

SCHOOL TELEPHONE NUMBER

For questions regarding this survey, please call the Census Bureau at 1-800-221-1204, Monday through Friday, between 8:30 a.m. and 5:00 p.m. (Eastern time).
2a. Is the institution or organization named on the front of this questionnaire a school? 105
$\square_{1}^{1} \square$ Yes No - Please explain $\rightarrow$
106 $\square$ GO TO item 3 below.
b. Is this school a private school? (For this survey, all elementary or secondary schools that are non-public are considered private schools, e.g., Roman Catholic schools, Hebrew day schools, Lutheran schools, private boarding schools, nonsectarian private schools, private schools that provide special education services to public school districts, etc.)
130
 Yes
$2 \square \quad$ No - Please describe the type of school, (e.g., public school, Bureau of Indian Affairs school, state school, charter school, etc.) $\downarrow$

c. Is this school still in operation?

100

d. Does this school teach any students in AT LEAST one of grades K to 12, or comparable ungraded levels (e.g., $K$ to 6,9 to 12, PK to 12, PK to $K$, etc.)?
115
15

No - Please record the grade level(s) taught in this school (e.g., nursery and prekindergarten, adult education, postsecondary).

e. Is this school located in the United States?

125

3. If you marked "No" for any of items $2 \mathrm{a}-\mathrm{e}$, do not complete this questionnaire. Please return it in the enclosed envelope. If you do not have the return envelope, mail your questionnaire to:
U.S. CENSUS BUREAU

ATTN: DCB 61G
1201 E. 10TH STREET
JEFFERSONVILLE, IN 47132-0001
If you marked "Yes" for all of items $2 \mathrm{a}-\mathrm{e}$ above, continue with item 4.

## INSTRUCTIONS

The data you enter on this form will be captured through the use of imaging technology. Please print all information clearly in ordinary characters, using a black ballpoint pen.

a. If you are unsure about how to answer a question, please give the best answer you can rather than leaving it blank.
b. If you have any questions, call the U.S. Census Bureau at 1-800-221-1204. Someone will be available to take your call Monday through Friday, between 8:30 a.m. and 5:00 p.m. (Eastern Time).
4. At the end of this questionnaire, you will be asked how long it took to complete this questionnaire. To help you with this, please record the time you begin.

Time started
5. How many students were enrolled in each of the following grade levels around the first of October?
Report only for the school or program named on the front of this questionnaire.
© Do NOT include postsecondary or adult education students, or children who are enrolled only in day care at this school or program.
©́ In column (1), mark (X) "Yes" or "No" for each grade level.
© In column (2), record the number of students for each grade level with "Yes" marked in column (1).

| Grade levels | (1) <br> Does this school or program have students in this grade? | (2) <br> Number of students in this grade |
| :---: | :---: | :---: |
| a. Ungraded (including ungraded special education students) | $\begin{array}{lll} 135 & 1 & \square \end{array} \text { Yes } \rightarrow 0 \text { No }$ | 140 |
| b. Nursery and prekindergarten | $\begin{array}{cccl} 145 & 1 & \square & \text { Yes } \rightarrow \\ & 2 & \square & \text { No } \end{array}$ | 150 |
| c. Kindergarten (traditional year of school primarily for 5 -year-olds prior to first grade) | $\begin{array}{lll} 155 & 1 & \square \\ & \text { Yes } \rightarrow \\ & & \square \end{array} \text { No }$ | 160 |
| d. Transitional (or readiness) kindergarten (extra year of school for kindergarten-age children who are judged not ready for kindergarten) | $\begin{array}{llll} 165 & 1 & \square & \text { Yes } \rightarrow \\ & & \square & \text { No } \end{array}$ | 170 |
| e. Transitional first (or prefirst) grade (extra year of school for children who have attended kindergarten but have been judged not ready for first grade) | $\begin{array}{lll} 175 & 1 & \square \\ & \text { Yes } \rightarrow \\ & \square & \square \end{array}$ | 180 |

5. Continued - How many students were enrolled in each of the following grade levels around the first of October?

6. Around the first of October, how many students enrolled in grades $\mathrm{K}-12$ and comparable ungraded levels were -
©́ Do NOT include nursery, prekindergarten, postsecondary, or adult education students, or children who are enrolled only in day care at this school or program.
© If none, please mark $(X)$ the box.
a. Hispanic or Latino, regardless of race?

b. White, not of Hispanic or Latino origin?

c. Black or African American, not of Hispanic or Latino origin?

d. Asian, not of Hispanic or Latino origin?

e. Native Hawaiian or other Pacific Islander, not of Hispanic or Latino origin?

Students
f. American Indian or Alaska Native, not of Hispanic or Latino origin?

g. Two or more races, not of Hispanic or Latino origin?

332 $\square$ Students
8a. Is this school or program coeducational?
335

b. Around the first of October, how many MALE students in grades K-12 and comparable ungraded levels were enrolled in this school or program?
© Do NOT include nursery, prekindergarten, postsecondary, or adult education students, or children who are enrolled only in daycare at this school or program.
© If none, please mark $(X)$ the box.
340
 Male students

9a. LAST school year (2008-09), were any students enrolled in 12 th grade?
345
Yes

No $\rightarrow$ GO TO item 10a below.
b. How many students were enrolled in 12 th grade around October 1, $2008 ?$

350 $\square$ 12th graders
C. How many students graduated from the 12th grade with a diploma last school year (2008-09)?
© Include 2009 summer graduates. Do not include students who received only vocational certificates, certificates of attendance, or certificates of completion.
© If none, please mark $(X)$ the box.
355
$0 \quad \square \quad$ None $\rightarrow$ GO TO item 10a below.

Graduates
d. Of those who graduated with a diploma last school year, approximately what percentage went to four-year colleges?
If none, please mark ( $X$ ) the box.
Round to the nearest whole percent.
360

10a. How long is the school day for a kindergarten, transitional kindergarten, or transitional first grade student?
© Mark ( $X$ ) only one box.
365
$0 \quad \square$ School or program does not offer kindergarten, transitional kindergarten, or transtional first grade $\rightarrow \begin{gathered}\text { GO TO instructions for } \\ \text { item } 11 \text { at top of page } 8 .\end{gathered}$

Full day (4 hours or more per day)
Half day (less than 4 hours per day)
Both offered
b. How many days per week does a kindergarten, transitional kindergarten, or transitional first grade student attend?
If the number of days per week varies (e.g., some students attend 3 days per week and some attend 5 days per week), record the most days that a student would attend in a week.

370 $\square$ Days per week

## INSTRUCTIONS AND AN EXAMPLE FOR ITEM 11

In item 11, we ask for the number of teachers for grades K-12 by the amount of time they teach at THIS school or program.

## Example:

The following is an example to illustrate how to report teachers in this item for a school or program that includes prekindergarten through grade 8.

If this school or program has eight full-time teachers for grades 1-8, one full-time teacher who teaches kindergarten $1 / 2$ time and prekindergarten $1 / 2$ time, a music teacher who teaches two days each week, a physical education teacher who teaches three days each week, and a teaching principal who teaches one 30 -minute class each day, you would complete item 11 as follows:None or $\square$ Full-time teachers
$\square$ Teach at least $3 / 4$ time but less than full time

0None or $\square$ Teach at least $1 / 2$ time but less than $3 / 4$ time
This number includes the one full-time teacher who teaches kindergarten $1 / 2$ time and prekindergarten $1 / 2$ time. The time he or she spends teaching prekindergarten is not counted in item 11.

This number also includes the physical education teacher who teaches three days a week.

0None or $\square$ 1

Teach at least $1 / 4$ time but less than $1 / 2$ time
This includes the music teacher who teaches two days a week.

0None or $\square$ 1

Teach less than $1 / 4$ time
This includes the principal who teaches one 30-minute class each day. The time he or she spends working as a principal is not included in item 11.
11. Around the first of October, how many persons were teaching in grades $\mathrm{K}-12$ and/or COMPARABLE ungraded levels at this school or program in the following time categories? - Consider only the amount of time an individual works as a teacher during a typical week at THIS school or program.
© Include:

- Regular classroom teachers
- Teachers who teach subjects such as music, art, physical education, and special education
- Teaching principals or administrators who teach a regularly scheduled class at this school or program
© Do NOT include:
- Teachers who teach ONLY nursery, prekindergarten, postsecondary, or adult education
- Student teachers, teacher aides, day care aides, or short-term substitute teachers
- Counselors, library media specialists or librarians, speech therapists, social workers, or administrators UNLESS they also teach a regularly scheduled class at THIS school or program
©́ If none, please mark $(X)$ the box.
None or $\square$ Full-time teachers Teach at least $3 / 4$ time but less than full time

395 $\square$
0 None or Teach at least $1 / 2$ time but less than $3 / 4$ time
$\square$ Teach at least $1 / 4$ time but less than $1 / 2$ time

405 $\square$ Teach less than $1 / 4$ time
$\square$ TOTAL TEACHERS
12. Which of the following best describes this school or program?
$\omega^{\omega}$ Mark ( $X$ ) only one box.
415REGULAR school - elementary or secondary

2MONTESSORI school

3
SPECIAL PROGRAM EMPHASIS school - such as a science or math school, performing arts school, talented or gifted school, foreign language immersion school, etc.

4SPECIAL EDUCATION school - primarily serves students with disabilities

5
CAREER/TECHNICAL/VOCATIONAL school - primarily serves students being trained for occupations
$7 \quad$ EARLY CHILDHOOD PROGRAM OR DAY CARE CENTER - such as kindergarten only, prekindergarten and kindergarten only, kindergarten and transitional first grade only, day care and transitional kindergarten only, etc.

6ALTERNATIVE/OTHER school - offers a curriculum designed to provide alternative or nontraditional education; does not specifically fall into the categories of regular, special program emphasis, special education, or vocational school - Please describe. $z$
416

13a. Is a major role of this school or program to support homeschooling?
420

b. Is this school or program located in a private home that is used primarily as a family residence?

425

[^0]:    ${ }^{1}$ The area-frame cases were not ready in time for the mailouts, and the new list-frame schools were schools that contacted NCES to be included in the PSS between the time the mailout file was produced and the time the areaframe file was ready.
    ${ }^{2}$ The response rate is calculated as follows: number of responding schools divided by the number of responding schools plus the number of nonresponding schools.
